The Swiss roof herb mixture

Creating habitats for endangered species.

Swiss seed mixture of selected plants for extensive habitats.

VIRIdiVITA Swiss roof herb mixture

Sedum album

Sedum acre

Sedum sexangulare

Alyssum alyssoides

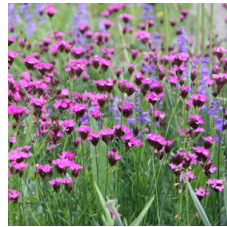

Thymus praecox

Teucrium botrys

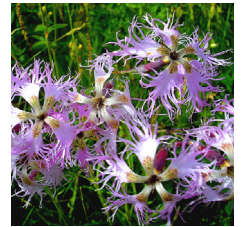

Teucrium chamaedrys

Dianthus carthusianorum

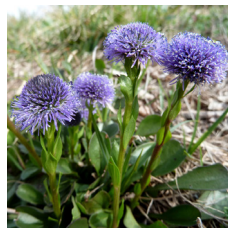

Dianthus sylvestris

Dianthus superbus

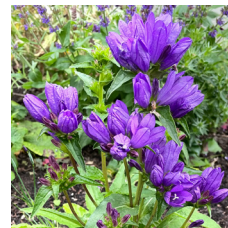

Veronica spicata

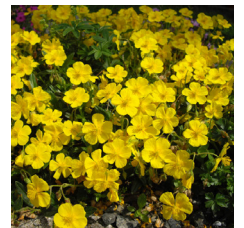

Globularia bisnagarica

Campanula cochleariifolia

Campanula glomerate

Helianthemum nummularium

The seed mixture consists of pure Swiss ecotypes with seed helpers. They originate from the natural habitat. They are plants that can withstand the most extreme weather conditions, develop into an extensive green roof over the years and are able to adapt to constantly changing climatic conditions. Native plants in extensive areas are also the basis for a diverse and colourful fauna.

VIRIdiVITA herbs Type A: growth height up to max. 20 cm

VIRIdiVITA herbs Type B: growth height up to max. 50 cm

Saatmenge: 10gr/m²
