valuable soil concentrate

Soil concentrate with mineral and organic products for greening systems enables nuanced mixtures according to ecological requirements.

VIRIdiVITA soil concentrate

- purpose:** - greening system with mineral and organic products
- function:**
- retention of precipitation water
 - peat-free
 - offers structural and networking elements to promote ecological diversity
- competitive edge:** - enables nuanced mixtures depending on ecological requirements

Swiss soil concentrate: As a supplement to mineral vegetation bases. The use of concrete gravel 0/32 is recommended; depending on the desired initial greening density, 5-30% VIRIdiVITA richsoil is added. The mixture is made on site, allowing the use of a local gravel material.

technical data:

~ 7.3	pH-value (H ₂ O)
~ 1.4 mS/cm	conductivity (salt content)
~ 900 kg/m ³	material weight according to EN 12580
50%	mineral content
